

## 2815059 - SE63: Translate the CDS view description and metadata extension texts

Component: BC-DOC-TTL (Basis Components > Documentation and Translation Tools > Translation Tools),  
Version: 6, Released On: 12.05.2022

### Symptom

A CDS view was created in English, for example, and its description/metadata extension texts must be available in other languages.

### Environment

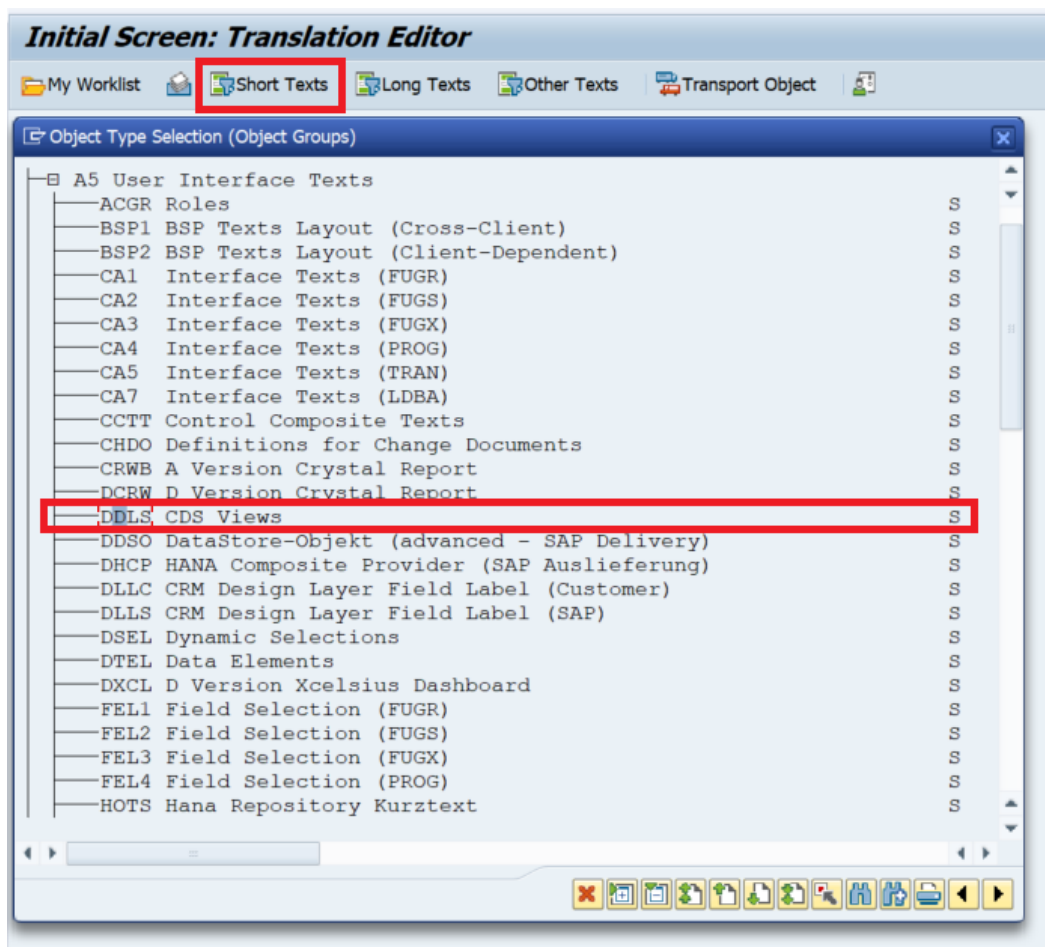

SAP NetWeaver 7.50, and higher releases.

### Resolution

The translation of CDS views description is supported on systems running SAP\_BASIS 750, or higher releases.

#### Steps to translate the CDS view description:

1. Launch transaction SE63.
2. Select option Short Text -> A5 User Interface Texts -> DDL S CDS Views.

3. Enter the CDS view name.
4. Select the source and target languages.
5. Translate the required text as required.

**ABAP Short Texts: CDS Views**

Display Transport Object    Technical Information

**Object**

Object Name: <CDS View name>

**Translation**

Source Language: deDE German DE

Target Language: enUS English US

Edit    Source/Target Language

6. Save the changes.

#### Steps to translate the CDS view metadata extension texts:

1. Launch transaction SE63.
2. Select option Short Text -> oo Meta Objects -> TLOG Lockable Logical Object (Meta).
3. In the Object Type field, enter DDLX.
4. In the Object Name field, enter the CDS view name followed by an asterisk.
5. Choose option F4 Possible Entries. The Restrict Selection Quantity dialog box pops up.
6. Choose option Continue (Enter).
7. Select the first object that ends with o2.
8. Select the source and target languages.
9. Choose option Edit.
10. Translate the texts as required.
11. Save the changes.
12. In the Object Name field, replace o2 with o6.
13. Repeat steps 8 to 10.
